

100% YOUNG COCONUT WATER

Our delicious coconut water comes from the southern tip of India, known as 'Land of Coconuts' - a region famous for its natural beauty and lush green coconut groves. Having grown up in this tropical heaven, we know a thing or two about coconut water and its amazing health benefits. Rooted in sustainability and ethical sourcing, we source our coconuts directly from farmers without a middleman. Urja has naturally less sugar, never heated, not heavily processed and nothing added. Our coconut water is gently cold crafted to maintain its natural state. Urja is simply 100% Young Organic Coconut Water bottled right at the source.
